

Sisters 'NAME' Brand Their Business & SIB Shows How!

SIB Clients can now add to their business tool box custom domain names and web address "parking", to include links to their other SIB webpages and/or their own business websites. This is just another powerful SIB solution enabling clients to better "brand" their business. This improves marketability, credibility, and networkability in the business marketplace. Now clients can do business more competitively online and offline, and gain points as a 21st century professional. Dorothea Johnetta Johnson (left) has already taken advantage of the service by registering her new domain www.innerglowskincare.com and parking it at her client page inside the SIB network; where there's a mall of internet traffic going 24-7. She then leverages her new web address on her business cards, car signs, voicemail messages, and when communicating with customers. It's SIB's network, advertise, market and empower (NAME) your business strategy.

Welcome New SIB Clients
